At present the quantities of various medical consumables projected by the department for the calculation of preliminary estimates for procurement are subject matter of review by the Finance Department. In the event of divergence of opinion between the departments over the quantities projected in the preliminary estimates, its resolution often takes substantial time which in turn results in delays in procurement. It has necessitated review of the existing system for seeking concurrence of preliminary estimates.

4. Enforcement of efficiency, economy and accountability in the procurement system.
5. That the proper care was taken in the evaluation, selection, ranking the responsive bids and selection of the successful bidder for placing of contract.

B. Role of the Medical Department.

1. Determination of the quantities of the consumables based on fair and justifiable grounds.
2. Proper Inventory Management to avoid over-stocking or short falls.
3. To ensure that there is no wastage of municipal funds on account of mis-use or expiry of supplies or on account of inventory carrying cost due to over-stocking.
